Spain: Engineering Semester at University of Navarra
Fall, Winter and Summer Semesters

Program Information

Spend a semester at University of Navarra located in Pamplona, Spain. University of Navarra has been recently ranked among the best by "The Herald Tribune" and is the best private school for Engineering in Spain and 3rd in the Global Ranking. TECNUN is strongly linked to a renowned Research Center, CEIT-IK4 with 330 researches working in 6 different departments, from traditional fields of engineering such as mechanical to new areas such as Biomedical Engineering. TECNUN and CEIT are strongly associated and share facilities and staff, developing multiple synergies. TECNUN Career Service works closely with the International Office, which provides interesting opportunities to students from partner universities not only in Exchange Programs, but also for internships and Senior Thesis both at TECNUN and the CEIT Research Center, and within the local industry.

University of Navarra is located by San Sebastian, a stunning summer destination and one of the most beautiful beach-towns in Europe. It is a city that is impossible not to fall in love with, as Lonely Planet states, and it is one of the "15 destinations on the rise", according to Tripadvisor. The location allows students to enjoy a variety of off-campus activities like water sports, hiking, motor sports and much more.

Academics

Students from the College of Engineering are eligible to take classes within the following concentrations: Industrial Technology Engineering, Mechanical Engineering, Electrical Engineering, Industrial Electronics Engineering, Telecommunications Systems Engineering, Electronics Communications Engineering, Industrial Management Engineering, Industrial Design and Product Development Engineering, and Biomedical Engineering.
